

Serial No. 09/839,5392222

2

Docket No. PU01-0171

**AMENDMENT TO THE SPECIFICATION**

Amend the paragraph commencing at page 10, line 14 as follows:

2  
As described before, there is an observed phenomenon that the power voltage value decreases in the period of ~~(I) - (IV) in Fig. 3~~ of (III) - (IV) in Figs. 4A and 4B because of startup current of the starter motor. The voltage waveform at the beginning of the voltage drop is as concretely shown in the circle of the figure, i.e. each power voltage is controlled to drop depicting a moderate curve and then returns without abrupt drop.
